

# Production display systems

boosting output with real-time information

Scrimsign has been working with some of the major players in Industry for over 25 years, we are well placed to meet your needs.

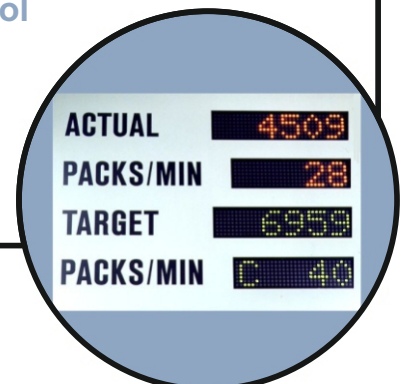

Scrimsign offers a range of indoor and outdoor solutions to suit the varied requirements of the Manufacturing Sector, including:

- Large Format LED Displays
- LCD Digital Signage
- Interactive Kiosks
- Local, Network and Wireless Communication
- PLC Interfaces
- Optical & Proximity Sensors etc
- Distributed Control Systems

We specialise in bespoke system design and software applications, this means that in addition to broadcasting general messages, live data can also be captured from any point in the production process to be displayed and/or analysed in real time, motivating and informing staff.

## key benefits & features

- Increased Productivity
- Increased Efficiency
- Quality Continuity
- Rapid broadcast of important information to key staff
- Automatic dynamic update of live data
- User friendly Software
- Intuitive control interfaces

## applications & client sample

- Aircraft engine production and repair:
  - **Rolls Royce, GE Caledonian**
- Food processing and production:
  - **Wrigleys, Lightbody, Grampian Country Pork**
- Computer manufacture and assembly:
  - **IBM, Sun Microsystems, HP/Compaq**
- Electronic component manufacture:
  - **National Semi-Conductor**
- Mobile phone manufacture and assembly:
  - **Motorola**
- Powertool manufacture and assembly:
  - **Black & Decker**
- Steel production and structure manufacture:
  - **Tata Steel / Corus**
- Automotive design, manufacture and assembly:
  - **Hitachi Automotive Systems**

**SCRIMSIGN**
