

# Security & Visitor Signs

Display Security & Site Information for your Visitors

Scrimsign can supply a wide range of outdoor LED signs for site security and visitor entrance applications.

Various character heights from 50mm to 200mm are available, ensuring optimum viewing distance can be achieved in virtually all locations. The outdoor LED signs dim automatically to ensure that they are clear to read in all ambient light conditions from direct sunlight to complete darkness. Our displays can be configured to provide specific number of lines and characters per line as required.

The signs can be wall or pole mounted and all of our outdoor LED signs are weatherproof, designed for longevity, flexibility, reliability and versatility.

Scrimsign has been designing manufacturing and installing custom electronic display solutions since 1986.
